Example 2: “Describe Your Financial Need in 100 Words “

I dropped out of high school when I was 15 because I got pregnant with my first child. After that, I had two more children by the time I was 20, and all four of us shared a one-bedroom apartment. I worked three jobs to keep the bills paid, but I never made much money. When my oldest went to high school, I decided to do the same. I got my GED at 29 and enrolled in nursing school. My financial status has improved now that I have a GED, but I’m still a single mom with three kids. I want to become a registered nurse to better my life and give my children a stable future. I appreciate your consideration.
